STANDARD

X-TECHNOLOGY

One model. Endless combinations.
The Cross-country saddle that adapts to every horse and rider.

Versailles K is the new mono flap cross-country saddle from the Smart Line, designed to offer a fully customized configuration that responds precisely to the individual needs of both horse and rider. Thanks to the wide range of available technical and stylistic options, the result is a truly made-to-measure saddle for the horse-and-rider combination. The saddle **tree**, with its curved profile and V-shaped front section for improved close contact, is available in two versions: standard, or with the innovative X-Technology, which integrates shock-absorbing membranes in the rear part, beneath the seat bones, for enhanced comfort and performance. The **seat** is offered in three depths to suit different riding preferences: DP (deep) for a more secure position, MD (medium deep) for a more centered position, and MF (medium flat) for increased freedom of movement. The **panels** are available in three variants, each designed to adapt to different horse back conformations: LPF flocked (non-integrated), Classic flocked

(non-integrated), and non-integrated Latex. The front **blocks** are also customizable, offered in two versions: small and anatomical, or large for greater support. **Leather** selection further enhances the personalization of the saddle, with several options that combine aesthetics, comfort, and long-term durability: Lux leather – premium, double-oiled leather, highly resistant and offering good grip; bovine leather – soft and grippy from the first use; hard leather – robust, durable, and ideal for intensive use. A wide choice of **color** combinations for the pipings and stitchings also allows for aesthetic customization that reflects the style and personality of the rider-horse combination. The new Versailles K is a modern reinterpretation of the **Passion K Jump** saddle, incorporating its key strengths into an updated mono flap model that is now even more configurable and customizable. A saddle specifically designed for cross-country riding, suitable for both professional riders and amateurs seeking to improve their position and enhance their horse's comfort — with the highest level of customization. Always keeping the well-being of the horse-and-rider combination at the center, thanks to its truly tailored design.
