- ② CHOICE BETWEEN DP, MD OR MF SEAT DEPTH
- ③ FIVE LEATHER OPTIONS
- ④ FIVE PANEL OPTIONS
- ⑤ THREE TYPES OF FRONT BLOCKS

STANDARD

X-TECHNOLOGY

One model. Endless combinations.
The jumping saddle that adapts to every horse and rider.

Versailles is the new jumping saddle from the Smart Line, designed to offer a fully customized configuration that precisely meets the needs of both horse and rider. It is a versatile model, thanks to the wide range of technical and stylistic options available. The saddle **tree** features a curved profile and a V-shaped front section to enhance close contact, and is available in two versions: the standard tree, or the innovative X-Technology version, which has membranes in the rear part, beneath the seat bones, to improve shock absorption. The **seat** comes in three depths: DP (deep) for a more secure position, MD (medium deep) for a centered position, and MF (medium flat) for riders seeking greater freedom of movement. The **panels**, designed to accommodate different horse back conformations, are available in five configurations: LPF flocked (either non-integrated or integrated), Classic flocked (non-integrated or integrated), and non-integrated Latex. The knee **blocks** are also fully customizable: riders can choose between

various fixed block shapes or opt for Velcro blocks, which can be positioned to suit individual preferences. Versailles is available in several **leather** types, tailored to meet different needs in terms of aesthetics, comfort, and durability: Lux leather, a high-quality, double-oiled leather offering good grip and resistance; Bovine leather, soft and offering great grip from the very first use; and hard leather, robust and ideal for intensive, long-lasting use. Customization is further enhanced by a wide range of **color** combinations for the pipings and stitchings, allowing riders to create a saddle that reflects their own personal style and that of their horse. The new Versailles represents the evolution of the **Versailles, Elastic Professional, and Passion Jump** models, bringing together their strengths into a single saddle that is even more configurable and contemporary, with more customization options than ever before. It is an ideal solution for both professional riders and amateurs looking to improve their position in the saddle and enhance their horse's comfort, with the highest level of personalization. Always with the well-being of horse and rider at the heart of its tailored design.
